Forest Reserves

## ELECTORAL DIVISIONS SHOWN IN RED —

HOW TO FIND SECTION, TOWNSHIP AND RANGE.  
The map consists of eight major quadrilaterals in dotted black lines. One square mile contains 36 sections. The three-quarters of an inch square (containing 36 Sections) are townships. Townships are numbered in red up the left side of the map.

The Principal Meridian runs north and south a few miles west of Winnipeg. Ranges are tiers of townships which parallel this Principal Meridian. They are numbered in red up the left side of the map. In Townships 4, 8 and 12, Range numbers are shown.

ILLUSTRATION: The section in the extreme southwest corner of Manitoba is Section 6, Township 5, Range 29.

West of the Principal Meridian (expressed 6-1-29-29).
